

THE BRIDAL BAR

INFO SHEET // ANTI-WRINKLE INJECTIONS

The Bridal Bar has partnered with one of Sydney's leading cosmetic specialist Dr Saras and Co. We believe in a practical, natural and conservative approach to restoring more youthful facial features and choose this brilliant team of experts for our clients, as they have the same approach. We believe in not taking away from who you are and the way you look, but simply making small changes so that no one will know but everyone will notice a fresher more youthful you. Its important our clients use only the best when choosing anti-wrinkle injections and dermal fillers, as it can alter the face cause more harm than good if you don't choose the right professional for the job.

A thorough consultation is performed prior to treatment for the client to discuss your particular concerns and treatment options addressing those concerns with the Dr Saras Team.

How do Anti-Wrinkle Injections Work?

Anti Wrinkle Injections/ Dysport are a natural protein that relaxes muscles to improve expression lines. They work by precisely inhibiting the nerve impulses which cause these tiny facial muscles to contract. No sedation or anaesthetic is required, you will be able to drive and resume normal activities after treatment.

Anti-Wrinkle Injections are contraindicated if you are pregnant, breast feeding or planning to fall pregnant. They are not suitable for those with certain neurological or muscular disorders.(Unless a referral is given you're your specialist)

Anti-Wrinkle Injections should be postponed in the presence of infection near the treatment area

Dermal Fillers

Restore the fullness of your face: Enhance the sexy contours of your eyes. Bring back the youthful look of your cheekbones & jaw lines. Plump lips, and get rid of those deep creases in the forehead. Even fill in smoker's lines, and lip lines. Soft tissue fillers will provide more volume and immediate results. Other types of Fillers will boost the skin's hydration levels and reduce creepiness, great for tops of hands & decollete.

Dermal fillers can be used in conjunction with other skin rejuvenation treatments and anti-wrinkle injections so no one will know but everyone will notice! Our experts will consult with you and recommend one or a combination of treatments to achieve your desired results. Filers will last between 3 – 12 months.
